Q: Google Colab Dataset API returns  
403 I am using the Google Colab API  
to fetch a few datasets from Google  
Sheets. For this I am using Google  
Sheets API v4. Here is the part of my  
code where I fetch the dataset from  
google.colab import drive from  
google.colab import auth  
drive.auth.authorize(client\_email =  
"xxx@xxx.xx", client\_id = "xxx",  
user\_agent = "xxx") dataset =  
drive.ColabDataset() The call to  
ColabDataset() gives me return  
status.HTTP\_403\_FORBIDDEN I tried  
a bunch of other dataset types as well.  
Also, I have only enabled the HTTP  
API for Google Colab. I tried enabling  
the API for Google Drive in addition,  
but it did not make any difference. I am  
running this code on Colab. Can  
anybody tell me what I am doing wrong  
here? A: I was just able to reproduce  
the 403 Forbidden error, using a colab  
notebook where the user agent was

---

being set to "python", and attempting to run any gcloud API: from google.colab

```
import drive
drive.auth.authorize(client_email =
"xxx@xxx.xx", client_id = "xxx",
user_agent = "python")
```

In order to access any gcloud API, you must first authorize gcloud (click on the green lock icon in the top `77a5ca646e`

SimLab iPad Exporter for SketchUp is a useful and reliable plugin worth having when you need to export SketchUp models, projects and sessions in \*.zim file format. By using SimLab iPad Exporter for SketchUp you have the possibility to easily access the Export button from the newly created ribbon menu. SimLab iPad Exporter for SketchUp is compatible with SketchUp 4.2.x and SketchUp 6.2.x. == License == All SimLab products are distributed under the terms and conditions of the GNU General Public License v3. For more information, please see == Supported SketchUp Versions == SimLab iPad Exporter for SketchUp has been tested on SketchUp 7.1.x and SketchUp 8.0.x. == Supported Operating Systems == SimLab iPad Exporter for SketchUp has been tested on Windows XP, Vista, Windows 7, Windows 8. == Recommended Requirements == SimLab iPad Exporter for SketchUp

---

requires Microsoft.NET Framework v4 to run. == Frequently Asked Questions ==

1) Is SimLab iPad Exporter for SketchUp reliable? Yes. SimLab iPad Exporter for SketchUp has been tested for several hours on different SketchUp models. All the export results were good without any glitch.

2) Are the \*.zim files really standard? Yes. ZIM is a generic file format used by SketchUp, as well as SketchUp Pro and SketchUp Mobile. The conversion from \*.skp to \*.zim is not yet supported for SketchUp Pro and SketchUp Mobile.

3) How can I get the old SketchUp Export button from the ribbon? If you have the button available in the ribbon menu, it's because you have the official version of SketchUp for iPad. The old export button is not included in the SketchUp 6.2 and later versions.

4) Are there any limitations on SketchUp Model? SimLab iPad Exporter for SketchUp is a high quality and powerful plugin for SketchUp, but it doesn't include all the features of SketchUp. If you have a model with lots of small planes and a lot of

---

vertices, it might not

#### **What's New in the SimLab iPad Exporter For SketchUp?**

SimLab iPad Exporter for SketchUp is a plugin allowing you to export SketchUp models, projects and sessions to \*.zim file format from SimLab application on iPad. It supports following workflows:

---

**System Requirements:**

**Minimum System Requirements:**

Windows 10, Windows 8.1, Windows 8, Windows 7, Windows Vista, Windows XP SP3 System
