I updated it to the latest version, v1.0.0.17, on the 2nd of July 2012, and it still works fine! It has a user interface, inspired by MSDoom (and by the way, it's called Nemesis II). This interface is called a 'panel', and the object of this interface is an object called 'parameters'. You can access the panel as a menu. You can access the parameters interface as many times as you want. You can also control the speed and attack of the panels, and the timing of the panels. I'll show you how to do it soon. First off, the interface is only available for Windows XP/Vista/7. Don't know about other operating systems? No problem: I programmed it so you can use DOSBox and emulate Windows with it. Let's dive into it. Como fazer para dar começo acesso direto. You can find the program in the archives area of this website. In there, you'll find the program itself, and the information that you need to download it. This information is arranged in a format so you can download the program easily and with no mistakes.
