While the game does not yet have a release date, players can access all of the new and improved features available from EA SPORTS FIFA 20 on day one, like controlling the game with a new series of new buttons that can be found on the controller. EA SPORTS FIFA 20 also introduced the new Player Impact Engine, which captures the forces that players apply during actions including tackles and headers, and uses that information to enhance the experience of players during off ball interactions. The Player Impact Engine is also used for player movement and movement off-ball. “The move to 64-bit means FIFA has unlocked the potential for more realistic, detailed and immersive gameplay, and we’ve been able to focus on bringing the player closer to the game’s action,” said David Rutter, Executive Producer at EA SPORTS. “The new ‘Player Impact Engine’ means we can capture the player’s actions, and apply those on-ball and off-ball behaviours to the player’s movement.” “We’ve been collecting data for several years, so it’s great to finally put it to good use,” said Mark Robinson, Senior Producer at EA SPORTS. “We’ve created over 90 new player models; these subtle details in the player’s movement or physicality, combined with ‘HyperMotion Technology,’ create a more realistic, authentic and enjoyable experience.”
