The puzzle game Puzzle Light is a match-3 in a puzzle genre, but rather than a simple match 3, it has a puzzle twist: You have to solve the puzzles by using light! Light is a puzzle game where the players are challenged to connect and turn light with a limited amount of different combinations, while still finding the best solution. To turn on and off a light or to switch lights or even wait for the light to change, players need to hit the light with a light, while the light is in their color range. Puzzle Light has a wide variety of puzzles to be solved. Make sure to have different light shades for the different colors. When using the light to catch the right light, players can randomly draw tiles from a table of puzzle pieces and connect them to lights or to solve puzzles. You will not be able to clear the puzzles unless you find the best solution. Are you ready for the light puzzle? The opportunity to find the best solution lies ahead! FEATURES: The game has a simple concept and a nice balance of difficulty Interactive and colorful puzzles to solve 24 puzzles with different contents High quality 3D graphics and animation Explore the light puzzle Solve 5 unique and challenging puzzles Get free hints and tips The game has a simple concept and a nice balance of difficulty. This game is suitable for beginners, as well as expert players. There are 24 puzzles to solve in the game. Puzzle pieces are placed on the light puzzle board to remove them and connect to the power source. If you don't find a solution, you can try again with new tiles. For example, if you turn one light on but the light is still out, you have to turn on one more light. Try to connect a light that falls within the same color range to the power source to solve the puzzle. LIGHT BLUE light The power source is placed at the bottom of the light puzzle board. Connect the power source to the light board to turn on the lights. What's more, you can find tiles of light green, yellow, red and blue. To turn on the power source, connect the tiles to the green and blue lights. If you want to turn off the power source, connect the tiles to the green and yellow lights. When you are done with the puzzle, slide the table to save your work. Solve the light puzzle In this light

The amazing stream With everything all tied up in a nice little bow, it's time for the game that I think might be the best on the platform. I don't know how it's possible, but it is. I don't know how it's possible, but I'm saying that it is. Let's start talking about how fun this game is. The moment you first sit down, and begin playing, you'll notice that it's pretty damn straightforward. You have a menu with four options: Game, Options, Messages and Friends. There's not a whole lot to say about the game that hasn't been said. It's straightforward, it's fun, and it's addictive. The beauty of this game is that the game is simple, and yet there are so many different problems to be solved. The game has a system that allows you to restart levels whenever you fail. So, when a level doesn't work, just restart it. It's hard, because you have to time this correctly, but it's rewarding, because you're replaying the same level, and you get better at it. Simple, fun, and rewarding. If you want to know a bit more about the game, there is a bit more that needs to be said about it, as well as some relevant links that you might find interesting. All of the visual effects are incredible. The character models are absolutely beautiful, and that's not really a surprise, considering the developers. The way that the game mimics the clanking machines and other things sounds amazing. Playing the game, you'll notice that there is a realistic audible system in the background, and it does an amazing job of sounding realistic. There's an incredible sense of scope and scale to the game that is unrivalled on any platform, and it's amazing. It's really worth playing the game for this alone. There's a great line of dialogue which sounds incredibly realistic, it's really hard to believe that the voice actors are actors, but they really are. There's a line in the game which says, "And the king went, "What's this, Jerry?" And I laughed my ass off. Cons The game has a few minor bugs which are worth mentioning. There are a lot of quips and jokes throughout the game. You'll notice that some quips are repeated more than once. This was done to prevent spoilers from occurring, but it does mean that it's
