Train Simulator: Hidaka Main Line: Tomakomai - Hidaka-Mombetsu Route Add-On Free

An adventure-filled 'add-on' for Train Simulator! Take on the role of a JR Hokkaido driver on the Hidaka Main Line, a 51km coastline route which still today serves the local communities in the region. The Hidaka Main Line was formed in 1913 as a branch of the JR East Hidaka Line and in 1927, it became part of the JR Hokkaido network. The line connects the nearby towns of Tomakomai, Tomikawa, Hidaka-Mitsuishi and finally Samani. While the local railway is still used, the line has had to 'make do' as service on the line was halted in 2015 when a typhoon and a subsequent tornado severely damaged the rail infrastructure. The new add-on takes place in 2016, and allows you to take control of the preserved KiHa 130 DMU, while enjoying the unique scenery of the route. In total, the add-on covers 51km (31 miles) of the route, with several dedicated scenarios including a rail accident, changing season conditions, snow storms and a fire. The scenarios are each filled with numerous challenges, such as driving in heavy fog, keeping to the timetable, finding friends and doing a passenger count! The addition of this Route Add-on also allows players to use the Quick Drive functionality of Train Simulator, and just as quickly as you started, you can end the add-on, and drive the railway, as and when you wish. Whether you are playing solo or with friends, this is your chance to experience the Hidaka Main Line - and all its hidden gems!
