The accompanying Lightroom mobile app was rolled into the update, and with it comes a plethora of iOS and Android photo capture and editing apps, with a bunch of new ones added over the past year. To be clear: nothing in the lightroom app provides the same functionality as Lightroom, but as long as you have it installed, you can access Lightroom's library and images on your phone. Adobe Lightroom CC for Windows and Mac will run you $89.99 for a perpetual license, while Lightroom for iOS and Android is free of charge. For small operations and independent photographers, having tools such as Photoshop, along with Lightroom, and the ability to share one image to multiple destinations with a single click make the decision to upgrade a no-brainer. How often do you find a software application that does it all, and does it well? How often do you find a software application that lets you do so many things? Adobe Photoshop has become one of those programs over the past few versions and this release was no different. Its richer feature set lets you work in the greater variety of document types that are available today, giving you greater control over the way you work.

The new In-Program APIs and improvements in the AI tools are expected to have an impact on multiple industries beyond photography. With an ever-expanding toolset, improved collaboration and more intuitive behaviors, people will be able to work more efficiently and more effectively with even greater speed-to-pixel satisfaction.
