In fact, working on the latest Photoshop is much easier than the previous version of the program. Getting started is a snap. Access to the tools and settings is faster than ever. In a move that clearly integrates the two products, Photoshop has become the de facto file-and-export heart of the creative workflow in Elements. Adobe recently added the Substance Designer tool to Photoshop, and this month, Substance introduced another major update. Studio lights, reflections, glows, scratches, fire, graffiti and more are all possible. Substance Designer and Asset Exchange are included in this release.
