PC Installation Instructions:

STEP 1: If necessary, uninstall the app if you have it installed on your iDevice. Some hacked IPAs will install as a duplicate app. Make sure to back it up so you don't lose your progress.

STEP 2: Download the pre-hacked .IPA file from the link above to your computer. To download from the iOSGods App, see this tutorial topic.

STEP 3: Download Sideloadly and install it on your PC.

STEP 4: Open/Run Sideloadly on your computer, connect your iOS Device, and wait until your device name shows up.

STEP 5: Once your iDevice appears, drag the modded .IPA file you downloaded and drop it inside the Sideloadly application.

STEP 6: You will now have to enter your iTunes/Apple ID email login, press 'Start' & then you will be asked to enter your password. Go ahead and enter the required information.

STEP 7: Wait for Sideloadly to finish sideloading/installing the hacked IPA.

STEP 8: Once the installation is complete and you see the app on your Home Screen, you will need to go to **Settings -> General -> Profiles/VPN & Device Management**. Once there, tap on the email you entered from step 6, and then tap on '**Trust **'.

STEP 9: Now go to your Home Screen and open the newly installed app and everything should work fine. You may need to follow further per app instructions inside the hack's popup in-game.

NOTE: For free Apple Developer accounts, you will need to repeat this process every 7 days. Using a disposable Apple ID for this process is suggested but not required. Jailbroken iDevices can also use Sideloadly to normally install the IPA with AppSync. Filza & IPA Installer (or alternatives) from Cydia also work. If you have any questions or problems, **read** our Sideloadly FAQ section of the topic and if you don't find a solution, please post your issue down below and we'll do our best to help! If the hack does work for you, post your feedback below and help out other fellow members that are encountering issues. You can specify either an array of objects, each of which applies to the series in the order given, or you can specify an object where each child has a numeric key indicating which series it applies to. For example, the following two declarations are identical, and declare the first series as black and absent from the legend, and the fourth as red and absent from the legend:
