The best tablets have traditionally been a large-screened alternative to smartphones. But just as the display sizes of phones continue to grow, tablets have seen their screen size increase as well. This is a welcomed trend for those who do a lot of work on a tablet, including students or those who work remotely and want something thin and lightweight, but with a large screen. What's not included in the box is Samsung's \$349 Book Cover Keyboard. The keyboard is a must-have accessory if you plan on doing any work on the Tab S8 Ultra, not only because it provides a physical keyboard and trackpad, but it's also the best way to take advantage of Samsung's DeX platform. When docked in the keyboard the standard Android 12 interface changes to something that looks and works like a regular computer with a desktop and windowed apps. If you want to spend less on a big tablet, Samsung's "FE" series of devices are designed with Samsung fans in mind. That is, the company takes the best features of its high-end devices, trims some of them down, and releases a more affordable product. I made in-store purchase of a new laptop and microsoft office on 12/26/2020. Unfortunately I lost the receipt with the product key before we could apply it. I put this on my best buy card, so I can verify the purchase that way. Of course, in addition to the official Surface Pro Type Cover from Microsoft, there are plenty of keyboard accessories from third parties, and those tend to be cheaper. If you're looking for a keyboard to pair with the Surface Pro 7, we've rounded up some of the best options around. Let's take a closer look. If you're looking to buy a Surface device today, we can't really recommend the Surface Pro 7 anymore. It's aged quite a bit, with the latest Surface Pro 9 packing newer 12th-generation Intel processors. You can check out the best Surface PCs you can buy today to see some great options. You can also take a look at some of the best Windows tablets if you enjoy that form factor more. That means you can get one of the best Surface Pro keyboards for your 2-in-1 that's much more affordable, whether it's the new Surface Pro 9 or a model from a few years ago. These are our favorite Surface Pro keyboard alternatives to Microsoft's Type Covers. This case-and-keyboard combination for Surface Pro 7-style devices features a removable Bluetooth keyboard and costs about the same amount as the other keyboards featured here. The case can also be set to position your Surface Pro at three different viewing or working angles, and it's made of PU leather with a microfiber interior. However, this keyboard does not have a trackpad, so it's best paired with an external mouse. If you're using a Surface Pro with the classic design, featuring on Surface Pro 7+ and older, the best choice for you is the FERRISA keyboard which features great feeling mechanical keys, and can also be used when detached from the Surface Pro thanks to its Bluetooth connection. Alternatively, there's also the CHESONA case and keyboard combo that provides you with a stylish PU leather case and a magnetic Type Cover keyboard in one value-packed package. Also, if you'd like some accessories to go with your Surface Pro, don't miss our list of all the best Surface Pro accessories available. If you're just looking for a basic, reliable TV for less than \$100, this is one of the best deals we've seen yet. On top of getting a 32-inch smart TV with Amazon's handy Fire TV interface baked in, you'll also get a free third-gen Amazon Echo Dot for using Alexa around your home. The LG C2 OLED is one of the best TVs we've tested, offering amazing picture quality and a fluid interface for browsing apps. It's close to its lowest price right now in a range of sizes from 42 to 83 inches. The Beats Fit Pro are our overall best wireless earbuds pick, offering superb features and comfort for iOS and Android users alike. They're currently back at their lowest price ever, complete with 4 free months of Apple Music. Logitech makes the majority of our best mouse picks, and the company's popular budget model is at its lowest price ever in a ton of different colors. This cheap mouse is a perfect companion to your laptop, and is a great way to boost your WFH game. We consider the Google Pixel 7 the best Android value out there, getting you amazing

cameras and a robust, fluid software experience. This aggressively priced phone is even cheaper for Black Friday, now at an all-time low. We named the Eero 6 mesh router, with its foolproof setup process and nearly unrivaled speeds and coverage areas, as your best bet when opting for a mesh router. Every model is close to its lowest price yet right now, starting at just \$75 for the base router. Best Buy is offering up to \$40 off select PlayStation exclusives, including lowest-ever prices on essentials like Ratchet & Clank: Rift Apart, Spider-Man: Miles Morales and The Last of Us Part II. If you're looking to flesh out your library with the best PS5 games, this is a great place to start. The Xbox Series S is the best value in console gaming, offering immersive, smooth gameplay and access to the superb Xbox Game Pass library. It's \$50 off for Black Friday, and by far the cheapest (and easiest to find) next-gen console out there. Amazon and the Amazon logo are trademarks of Amazon.com, Inc. or its affiliates. Plus, there are often good value bundles in sales events. We see many that combine previous-generation models and the near-essential keyboard cover for free - and that's definitely the best time to buy. One thing you should check before you buy a Surface Pro is to see whether it comes with a Surface Pro keyboard. This useful accessory is not always included in many of the cheapest Surface Pro deals so keep that in mind when looking at the price. Retailer sites may show it in product images, though, which can be a little misleading. You can pick up the keyboard and cover hybrid separately, so we've included the best prices for it today on this page as well, but many places will allow you to add one to your order at the same time, too. But being the best Surface Pro in years comes at a significant cost: it's the most expensive device out there. The Surface Pro 8 starts at \$1,099 / £999 / AU\$1,649, which is much more expensive than it's been in the past. Compare that with the Surface Pro 7 which launched for \$749 / £799 / AU\$1,249 in 2019. That price increase does come with much-needed improvements, but it makes the tablet a harder sell. Add to that the fact that the Surface Pro 8 still doesn't come with the Type Cover in the box and you're looking at a big investment all around. Now is the best time to find even more incredible deals and discounts on tablets, streaming devices and massive markdowns on top-tier TVs. You'll also score big when it comes to home appliances, kitchen gadgets, and smart home devices. Shop right now to take advantage of these markdowns! Also, be sure to check out our latest review of the MSI Titan GT77 HX 13V. While likely out of the price range for most consumers, this MSI gaming beast is tricked out with the very best performance features on the market. If you have the cash to burn, this laptop will smoke all competitors.
