

000002.jpg

I am using crawler to download some images from google, but I find the download files are named with 000001.jpg, 000002.jpg. But what I expect is that when the image downloads and at the same time change its name to the keyword (such as Coláiste Íosagáin.jpg, Mount Anville Secondary School.jpg, St Laurence College.jpg)
