TELUS International AI-Data Solutions partners with a diverse and vibrant community to help our customers enhance their AI and machine learning models. The work of our AI Community contributes to improving technology and the digital experiences of many people around the world. Our AI Community works in our proprietary AI training platform handling all data types (text, images, audio, video and geo) across 500+ languages and dialects. We offer flexible work-from-home opportunities for people with passion for languages. The jobs are part-time, and there is no fixed schedule. Whoever you are,

wherever you come from, come join our global AI community. www.telusinternational.com

A downed tree has damaged several telephone poles and fibre cables, causing intermittent internet, TV, home phone and wireless service outages between Burns Lake and Terrace in northern B.C., according to Telus. Charlene Fast is employed at Dolly's Fish Market. She says the business was unable to process any orders. They opened early in anticipation of a cruise ship bringing customers in, but the internet shut down shortly afterwards. TELUS offers a variety of high-speed internet options that differ depending on where a user lives. Speeds of up to 940 Mbps are available in several regions. All internet plans feature unlimited data when users join up for a two-year term. With PureFibre X, users get the fastest internet technology and the fastest Wi-Fi in Western Canada. Furthermore, all PureFibre online orders include Wi-Fi 6, allowing customers to experience quicker speeds on more devices. Thanks to its tri-band technology, users get excellent streaming, video calling, and gaming on many devices simultaneously. London has lost a homegrown

high-tech darling as internet service provider Start.ca was sold to industry giant Telus, the latest casualty in a national tech turf war that has seen independent internet providers snapped up. But consumers, and the industry, have lost an independent voice in the telecom sector amid consolidation, as Rogers is about to buy Shaw and Videotron snaps up Freedom Mobile. The loss of small businesses and less competition is worrisome, said Peter Nowak, vice-president of insight and engagement at TekSavvy, a Chatham-based independent internet provider that has long been a critic of industry consolidation. We thank you for your loyalty and for trusting in us for being your internet service provider. We have appreciated the opportunity to serve you and we are excited for Mascon by TELUS to provide the next generation of communications and entertainment for our valued customers. telus.com/community. Fibre optic internet brings opportunities to residents, businesses, organizations, and essential services. Once it is installed, homes and businesses have the option to connect to the fibre optic network. The **MyFax Central web portal** allows you to easily send and receive your faxes through your internet browser. This comes with the added bonus of granting you access to your account details and all your archived faxes. This allows you to boost efficiency by improving your workflows. With the internet, you no longer need an expensive fax machine to send or receive a fax. There are plenty of services that allow you to send and receive faxes. Some will enable you to integrate your faxing service with popular apps. Point-to-point network connections are a wireless, secure, private data connection between two or more locations. They provide a connection which is capable of sharing internet, video, and even telephony. Point-to-point connections can range from several hundred feet to as much as several kilometers. This technology can be installed and applied virtually anywhere you would like to extend your local area network between

structures or locations. There are many applications where point-to-point connections can be applied. The most common are multifacility plants, agriculture, new detached additions, municipalities, and construction. Accessing this real-time information along with detailed analytics will help you make informed decisions about your assisted living facility. You will be able to see the times when alarms were initiated, who accepted the alarm, where it was generated, escalation level when it was accepted, staff/resident location, average response time by caregiver, and more.

TELUS Business Internet

At each business there are several different TELUS internet options. Our experts will research and

provide you with the best solutions and order the service that is right for you. Our experts can become your single point of contact for all your TELUS needs. For each of your business addresses we will research and qualify all internet options available, provide you with all the available options including quoting the best rates, answer any of your questions and order your service for you. Your business should be able to operate anywhere you are, and your internet or lack thereof should not stop you. With our smart hub, you will not have to worry about spotty or dropped signals. The smart hub offered by The Phone Experts uses the LTE network to provide high-speed internet access, so your business can run smoothly no matter where you are. As one of Canada's big three providers, Telus serves millions of Canadians across the country. Despite being primarily known for their mobile phone plans, Telus internet is currently available in select regions of Quebec, Alberta and British Columbia. As a company with such an established reputation, customers can expect high-quality internet at affordable prices. Telus internet plans are reliable, fast and simplified.

Their fibre optic internet plans ensure lightning-fast connection. Further, users can enjoy their advanced Wi-Fi hubs which strengthen and widen their home internet. Telus internet packages offer speeds up to 1Gbps, and offer decent prices that shouldn't break your bank. As of August 2021, Telus home internet plans are only available in certain areas of Quebec, Alberta and British Columbia. If you want to check your eligibility, visit Telus' website and click on the "Check availability and plans" tab. Bracebridge now has 1Gigabit high-speed fibre internet, the fastest in Ontario. This service allows your business to transfer data files over 50 times faster than the average data transfer speed in Canada. Data-speeds are guaranteed as is the reliability and security.
