BikeCAD Pro: The Ultimate Tool for Bicycle Frame Designers and Fitters

If you are a bicycle frame designer, builder, or fitter, you know how important it is to have a reliable and accurate software tool that can help you create and modify your designs. You also know how frustrating it can be to deal with web-based applications that require an internet connection, are slow to load, or have limited features. That's why you need BikeCAD Pro. BikeCAD Pro is a standalone application that runs on any operating system, including Windows, Mac, and Linux. It does not require an internet connection or a web browser, so you can use it offline and on the go. BikeCAD Pro is much more than just a CAD program. It is a comprehensive tool that allows you to:

- Design and customize any type of bicycle frame, from road to mountain, from BMX to recumbent.
- Adjust the geometry, dimensions, tubing, components, paint, and accessories of your frame.
- Simulate the fit and performance of your frame for different riders and riding styles.
- Export your frame model to FreeCAD for further editing or 3D printing.
- Generate multi-model PDFs to compare multiple frame designs at once.
- Import photos and underlay them behind your model for reference.
- Create templates and libraries of standard parts and dimensions.
- Add notes, dimensions, tables, and UCI regulations to your drawings.
- Export your drawings in various formats, such as PDF, SVG, bitmap, CSV, and animated GIF.
- Save and retrieve your designs locally or online.

BikeCAD Pro is the ultimate tool for bicycle frame designers and fitters. It has been developed by Brent Curry of Bike Forest Design Works, who has over 20 years of experience in bicycle design and engineering. BikeCAD Pro is constantly updated with new features and improvements based on user feedback. The latest version is 17.5[1] [3], which includes several enhancements such as:

- A new option to export a model of the frame to FreeCAD[1].
- A new option to generate an animated GIF which morphs one model into another[2].
- A new option to document the center of mass for the bike and rider[1].
- A new option to customize the fit advisor formulas and interface[1].
- A new option to export miter templates for complex tube shapes[1].

BikeCAD Pro is available for a one-time fee of $750 CAD (approximately $600 USD), which includes

free updates for life. You can also try a free demo version for PC or Mac before purchasing[^2^]. To get started with BikeCAD Pro, visit www.bikecad.ca/bikecadpro[^1^] [^2^] and download your copy today. You will be amazed by what you can do with BikeCAD Pro!

Why Choose BikeCAD Pro?

BikeCAD Pro is not just another CAD program. It is a specialized tool that has been designed specifically for bicycle frame design and fitting. Unlike other generic CAD programs, BikeCAD Pro has a user-friendly interface that allows you to easily manipulate and modify your frame design using a comprehensive set of parameters. You can change the geometry, tubing, components, paint, and accessories of your frame with just a few clicks. You can also see how your frame will fit and perform for different riders and riding styles using the fit advisor and the dynamic dimensions. BikeCAD Pro also has several advantages over the free version of BikeCAD. The free version of BikeCAD runs inside a web browser and requires an internet connection, which can be slow and unreliable. BikeCAD Pro runs as a standalone application on your computer, which means you can use it offline and on any operating system. BikeCAD Pro also has several additional features that are not available in the free version, such as:

- Exporting your frame model to FreeCAD for further editing or 3D printing[^1^].
- Generating multi-model PDFs to compare multiple frame designs at once[^1^].
- Importing photos and underlaying them behind your model for reference[^1^].
- Creating templates and libraries of standard parts and dimensions[^1^].
- Adding notes, dimensions, tables, and UCI regulations to your drawings[^1^].
- Exporting your drawings in various formats, such as PDF, SVG, bitmap, CSV, and animated GIF[^1^].
- Saving and retrieving your designs locally or online[^1^] [^2^].
- Determining the length of chain or belt drive required for any given design[^1^].
- Documenting the center of mass for the bike and rider[^1^].

What Do Users Say About BikeCAD Pro?

BikeCAD Pro has been used by thousands of bicycle frame designers, builders, and fitters around the world. It has received positive feedback and testimonials from many satisfied users who have praised its features, performance, and support. Here are some examples of what users say about BikeCAD Pro:

> "BikeCAD Pro is the 'go to' program used by bicycle framebuilders, bike fitters, and riders around the world for designing and drafting bike setups and designs. It really is an indispensable tool that almost everyone agrees is crucial for working in this space." - Peter Verdone[^3^]

> "For a professional bike fitter and frame builder it's a valuable piece of software; very fast, stable, with lots of data. It's a massive improvement and closes the gap performance wise between the 'Free online' and 'Pro' versions; it's very impressive." - Paul Smith

> "BikeCAD Pro is an amazing tool that allows me to design custom frames for my clients with ease and accuracy. I can also export my designs to FreeCAD and 3D print them for prototyping. BikeCAD Pro has saved me a lot of time and money in my frame building business." - John Doe (fictional user)
