How to Download Smart YouTube APK for Your Smart TV

If you are looking for a better way to watch YouTube videos on your smart TV, you might want to try Smart YouTube APK. This is a free and open-source app that lets you enjoy YouTube without ads, Google services, or root permission. In this article, we will show you what Smart YouTube APK is, how to install it on your smart TV, and how to use it.

What is Smart YouTube APK?

Smart YouTube APK is an alternative YouTube client that was created by an independent developer named Yuriy Lyskov. This app allows you to install and use a customized YouTube app on your smart TVs that run on the Android TV operating system or support side-loading an APK file onto them.

Features of Smart YouTube APK

- Supports up to 4K video resolution
- Has a built-in adblocker that blocks ads and banners
- Does not require Google services or root permission to work
- Lets you log in to your YouTube account without Google services
- Supports remote controllers and keyboards
- Has a multilingual interface and keyboard
- Updates automatically or manually
- Has four different launchers to choose from

Benefits of Smart YouTube APK

- Provides a better YouTube experience on larger screens and smart TVs
- Saves data and battery by eliminating ads and unnecessary services
- Protects your privacy by avoiding Google tracking and permissions
- Gives you more control over your YouTube settings and preferences
- Enhances your video quality and performance with various options

How to Install Smart YouTube APK on Your Smart TV

To install Smart YouTube APK on your smart TV, you need to follow these steps:

Enable Unknown Sources

Before installing Smart YouTube APK, you need to enable unknown sources in your system settings. This will allow you to install apps from external sources other than the official app store. To do this, go to your system settings, look for security settings, then enable the "Install apps from unknown sources" option.

Download and Transfer the APK File

Next, you need to download the latest version of Smart YouTube APK from its official website or any trusted source. You can use your computer or smartphone to do this. Then, transfer the downloaded APK file to any external USB flash drive, plug it into your smart TV, and locate the file using a file manager app.

Install and Launch the App

Finally, you need to install the app like you would any mobile app on your smartphone. Just tap on the APK file and follow the instructions on the screen. After installation, you will find the shortcut on the home screen of your TV. Tap on it to launch the app.

How to Use Smart YouTube APK on Your Smart TV

To use Smart YouTube APK on your smart TV, you need to do the following:

Choose a Launcher

When you first open the app, you will be asked to choose from four different launchers: Lite Alt, Pro Alt, Lite Main, and Pro Main. The Lite launchers have fewer features but open videos faster. The Pro launchers support 60fps and AFR (automatic frame rate). Choose the one that works best for you and tick the "remember" checkbox if you want to apply it every time you open the app.

Log in to Your YouTube Account

If you want to access your YouTube account without Google services, you can log in to your YouTube account using the app. To do this, go to the settings menu, then tap on the "Sign in" option. You will see a code on the screen. Then, use your smartphone or computer to visit youtube.com/activate and enter the code. You will be asked to confirm your account and grant some permissions. After that, you will be logged in to your YouTube account on your smart TV.

Browse and Watch Videos

Now you can browse and watch videos on your smart TV using Smart YouTube APK. You can use the remote controller or keyboard to navigate the app and select videos. You can also use the voice search feature to find videos by speaking into the microphone. You can adjust the video quality, speed, subtitles, and other settings by tapping on the gear icon on the video player. You can also access your subscriptions, playlists, history, and other features by tapping on the menu icon on the top left corner of the app.

Conclusion

Smart YouTube APK is a great app for watching YouTube videos on your smart TV without ads, Google services, or root permission. It has many features and benefits that enhance your YouTube experience on larger screens and smart TVs. To download and install Smart YouTube APK on your smart TV, you need to enable unknown sources, download and transfer the APK file, and install and launch the app. To use Smart YouTube APK on your smart TV, you need to choose a launcher, log in to your YouTube account, and browse and watch videos.

FAQs

- **What is the difference between Smart YouTube APK and YouTube Vanced?**

YouTube Vanced is another alternative YouTube client that blocks ads and offers some extra features. However, it requires Google services and root permission to work properly. Smart YouTube APK does not require Google services or root permission and works better on smart TVs.

- **Is Smart YouTube APK safe to use?**

Smart YouTube APK is safe to use as long as you download it from its official website or any trusted source. It does not contain any malware or viruses that can harm your device or data. However, you should always be careful when installing apps from unknown sources and check the permissions they request.

- **How do I update Smart YouTube APK?**

Smart YouTube APK updates automatically or manually depending on your settings. You can check for updates by going to the settings menu, then tapping on the "About" option. You will see the current version of the app and the latest available version. If there is an update available, you can tap on the "Update" button to download and install it.

- **How do I uninstall Smart YouTube APK?**

To uninstall Smart YouTube APK from your smart TV, you need to go to your system settings, look for apps settings, then find and select Smart YouTube APK from the list of installed apps. Then, tap on the "Uninstall" button and confirm your action.

- **How do I contact Smart YouTube APK developer?**

If you have any questions, feedback, or issues with Smart YouTube APK, you can contact its developer by visiting its official website or GitHub page. You can also join its Telegram group or Discord server to communicate with other users and get support.
