How to Fix the Error "Failed to Launch Game Uplay PC Has Not Been Installed"

If you are trying to play a game that requires Uplay PC, but you get an error message saying "Failed to launch game Uplay PC has not been installed", you are not alone. Many gamers have encountered this issue and have been frustrated by it. Fortunately, there are some simple solutions that can help you fix this error and enjoy your game.

In this article, we will explain what causes this error, and how to fix it in different scenarios. We will also provide some tips on how to prevent this error from happening again in the future.

What Causes the Error "Failed to Launch Game Uplay PC Has Not Been Installed"?

The error "Failed to launch game Uplay PC has not been installed" usually occurs when the game launcher cannot find the Uplay PC client on your computer. This can happen for various reasons, such as:

- You have not installed Uplay PC on your computer.
- You have installed Uplay PC on a different drive or folder than the default one.
- You have moved or deleted the Uplay PC folder or files.
- You have corrupted or outdated Uplay PC files.
- You have a firewall or antivirus software that blocks Uplay PC from running.

Depending on the cause of the error, you may need to try different solutions to fix it.

How to Fix the Error "Failed to Launch Game Uplay PC Has Not Been Installed"?

Here are some possible solutions that can help you fix the error "Failed to launch game Uplay PC has not been installed". You can try them one by one until you find the one that works for you.

Solution 1: Install Uplay PC on Your Computer

The most obvious solution is to install Uplay PC on your computer if you have not done so already. You can download the latest version of Uplay PC from the official website: <https://uplay.ubisoft.com/>.

After downloading the installer, run it and follow the instructions on the screen. Make sure you install Uplay PC on the same drive and folder as your game launcher. For example, if your game launcher is on C:\Program Files (x86), you should install Uplay PC on C:\Program Files (x86)\Ubisoft\Ubisoft Game Launcher.

Once you have installed Uplay PC, restart your computer and try launching your game again. If the error persists, move on to the next solution.

Solution 2: Verify the Location of Uplay PC on Your Computer

If you have already installed Uplay PC on your computer, but you still get the error "Failed to launch game Uplay PC has not been installed", it may be because the game launcher cannot find the Uplay

PC client on your computer. This can happen if you have installed Uplay PC on a different drive or folder than the default one, or if you have moved or deleted the Uplay PC folder or files.

To fix this issue, you need to verify the location of Uplay PC on your computer and make sure it matches with the location that your game launcher expects. To do this, follow these steps:

1. Open File Explorer and navigate to the folder where you have installed Uplay PC. The default location is C:\Program Files (x86)\Ubisoft\Ubisoft Game Launcher.
2. Right-click on the file named upc.exe and select Properties.
3. Click on the Details tab and check the Product version. It should be 120 or higher. If it is lower than 120, you need to update your Uplay PC client.
4. Click on the Compatibility tab and make sure that Run this program as an administrator is unchecked. If it is checked, uncheck it and click OK.
5. Close File Explorer and open your game launcher. Right-click on your game icon and select Properties.
6. Click on the Local Files tab and click on Browse Local Files. This will open the folder where your game is installed.
7. Look for a file named uplay_install.state and open it with Notepad or any other text editor.
