

# Sonokinetic Sultan Strings [KONTAKT Library] !!EXCLUSIVE!!

## Sonokinetic Sultan Strings: A Review of the Kontakt Library

If you are looking for a realistic and expressive string library that captures the essence of the Middle Eastern musical tradition, you might want to check out Sonokinetic Sultan Strings. This Kontakt library features a collection of sampled string instruments from Turkey, Egypt, Iran, and Morocco, played by authentic performers using various articulations and techniques. In this article, we will review the features, sound quality, and usability of Sonokinetic Sultan Strings, and see how it can enhance your musical projects.

### Features of Sonokinetic Sultan Strings

Sonokinetic Sultan Strings is a Kontakt library that requires the full version of Kontakt 5.1 or higher. It occupies about 3 GB of disk space and comes with 20 NKI patches that cover different string sections and solo instruments. The library includes the following instruments:

- Violin section (6 players)
- Viola section (4 players)
- Cello section (3 players)
- Bass section (2 players)
- Solo violin
- Solo viola
- Solo cello
- Solo bass
- Kemenche (Turkish bowed instrument)
- Lyra (Greek bowed instrument)
- Rabab (Afghan bowed instrument)
- Rebab (Moroccan bowed instrument)

Each instrument has its own set of articulations and techniques that can be triggered by key

switches or velocity. Some of the articulations include:

- Sustain
- Staccato
- Tremolo
- Pizzicato
- Col legno
- Spiccato
- Trills
- Glissando
- Slides
- Bends
- Vibrato
- Mute

The library also features a unique phrase builder that allows you to create realistic and complex melodic patterns using pre-recorded phrases. You can choose from over 1500 phrases in different scales and modes, and assign them to different keys on your keyboard. You can also adjust the tempo, pitch, volume, and pan of each phrase, as well as layer them with other instruments or articulations.

## **Sound Quality of Sonokinetic Sultan Strings**

Sonokinetic Sultan Strings delivers a high-quality sound that is rich, warm, and expressive. The samples are recorded in 24-bit/44.1 kHz resolution using multiple microphones and preamps, resulting in a clear and detailed sound. The instruments are played by professional musicians who have mastered the nuances and subtleties of the Middle Eastern style. The phrases are also recorded in various tempos and keys, ensuring a natural and authentic performance.

The library offers a simple and intuitive interface that allows you to tweak the sound to your liking. You can adjust the volume, pan, reverb, EQ, and compression of each instrument or phrase using the built-in effects. You can also switch between different microphone positions (close, decca, wide) to change the ambience and perspective of the sound. Additionally, you can use the modulation wheel to control the dynamics and expression of the instruments.

## **Usability of Sonokinetic Sultan Strings**

Sonokinetic Sultan Strings is a versatile and easy-to-use library that can be used for various genres and projects. Whether you want to create a cinematic soundtrack, a world music composition, or a fusion piece, you can find the right sounds and phrases in this library. You can also mix and match different instruments and articulations to create your own unique combinations.

The library is compatible with any DAW that supports Kontakt 5.1 or higher. You can load it as a standalone instrument or as a plugin in your DAW. You can also use it with other Sonokinetic libraries or third-party libraries to expand your sonic palette.
