## Minecraft Carpenters Blocks Mod 1.8: A Guide for Builders

If you are a fan of Minecraft and love to create custom structures, you might want to check out the Carpenters Blocks mod for version 1.8. This mod adds a variety of new blocks that can be customized with different textures, shapes, and colors. You can also use the Carpenter's Hammer and Carpenter's Chisel to modify the blocks in-game. Here are some of the features and benefits of using this mod:

- You can create slopes, stairs, slabs, doors, windows, beds, fences, gates, and more with the Carpenters Blocks.
- You can apply any texture from any block to the Carpenters Blocks, including modded blocks. You can also mix and match different textures on the same block.
- You can change the shape and size of the blocks with the Carpenter's Hammer and Carpenter's Chisel. You can also rotate, flip, and mirror the blocks.
- You can add special effects to the blocks, such as glow, transparency, grass, snow, ladder, lever, redstone, and more.
- You can create hidden doors and secret passages with the Carpenters Barrier and Carpenters Collapsible Block.

The Carpenters Blocks mod is compatible with Forge and other mods that use the Forge API. You can download it from [CurseForge](#) or [Minecraft Forum](#). To install it, you need to copy the .jar file to your mods folder and run Minecraft with Forge.

If you want to unleash your creativity and build amazing structures in Minecraft, you should give the Carpenters Blocks mod a try. It will add a lot of variety and customization options to your game. Happy building!

### How to Use the Carpenters Blocks Mod

To use the Carpenters Blocks mod, you need to craft the Carpenters Blocks and the tools first. Here are the recipes:

Item	Recipe
Carpenter's Block	

Carpenter's Hammer 

Carpenter's Chisel 

Once you have the Carpenters Blocks and the tools, you can start building with them. To apply a texture to a block, simply right-click it with any block in your hand. To remove a texture, right-click it with the Carpenter's Hammer. To change the shape or size of a block, left-click it with the Carpenter's Hammer or the Carpenter's Chisel. To rotate, flip, or mirror a block, sneak and right-click it with the Carpenter's Hammer. To add special effects to a block, sneak and right-click it with the corresponding item. For example, to make a block glow, sneak and right-click it with a torch.

You can also use the Carpenters Blocks to create hidden doors and secret passages. To do this, you need to use the Carpenters Barrier and the Carpenters Collapsible Block. The Carpenters Barrier is a block that looks like a fence or a gate, but can be opened and closed with redstone. The Carpenters Collapsible Block is a block that can be flattened or raised with the Carpenter's Hammer or the Carpenter's Chisel. You can use these blocks to create walls or floors that can be moved or hidden with redstone.
