How to Download and Install Skyrim Naruto Jutsu Mod

If you are a fan of both Skyrim and Naruto, you might be interested in adding some ninja skills and abilities to your Dragonborn. The Skyrim Naruto Jutsu Mod is a mod that adds over 100 new spells and powers from the Naruto anime, as well as weapons, armor, and items inspired by the series. In this article, we will show you how to download and install this mod, as well as some of its features and requirements.

Downloading the Mod

The Skyrim Naruto Jutsu Mod is available on both Nexus Mods and Steam Workshop. You can choose either one depending on your preference. Here are the links to the mod pages:

- [The Uchiha Clan \(SE\) at Skyrim Special Edition Nexus - Nexus Mods](#)
- [Steam Workshop::Naruto Ultimate Overhaul](#)

The Uchiha Clan mod is an add-on that makes it possible to choose the Uchiha race, having access to their powers, including an ever evolving Sharingan. The Naruto Ultimate Overhaul mod adds the spells, weapons, armor, and items from the Naruto series. You can use both mods together or separately.

Installing the Mod

If you are using Nexus Mods, you can download and install the mod with a mod manager like Vortex or Mod Organizer 2. The mod has a nice FOMOD installer for you to pick your options. You will also need to download and install the RaceCompatibility for Skyrim Special Edition mod and the SkyUI mod as requirements.

If you are using Steam Workshop, you can subscribe to the mod and open the Skyrim Launcher. The mod will be installed automatically from that point and you can play the game. You will also need to download and install the Skyrim Script Extender (SKSE) as a requirement.

In both cases, you should use LOOT to automatically sort your load order after installation is complete.

Using the Mod

Once you have installed the mod, you can start a new game or load an existing one. If you want to play as an Uchiha, you can choose that race in the character creation menu. You will also have access to their eyes and hairstyles. If you want to use the spells and powers from the Naruto series, you can find them in various locations throughout Skyrim. Some of them are sold by vendors, some of them are found in chests or dungeons, and some of them are learned by reading scrolls or books. You can also craft some of the weapons and armor at a forge or anvil.

Some of the spells and powers included in this mod are:

- Amaterasu - Shout that burns any target you aim at.
- Tsukuyomi - Paralyzes any NPC.
- Byakugan - Detects all creatures nearby.
- Sharingan - Slows time.
- Shinra Tensei - Knocks back enemies.
- Chidori - Short ranged lightning attack.
- Rasengan - Short ranged wind attack.
- Kirin - One hit KO lightning strike.
- 8 Gates - Sacrifices your health for great boosts to physical skills.
- Sage Mode - Increases regeneration of all stats.
- Kyuubi Mode - Greatly increases all stats but drains health unless deactivated.

And many more!
