How to Use Donsson MTK IMEI Tool to Repair IMEI on MediaTek Devices

IMEI (International Mobile Equipment Identity) is a unique 15-digit number that identifies your mobile device. It is important to have a valid IMEI number for proper network connectivity and legal compliance. However, sometimes your IMEI number may get corrupted or lost due to various reasons, such as flashing a custom ROM, rooting your device, or installing a faulty firmware.

If you have a MediaTek device and you are facing IMEI-related issues, then you can use Donsson MTK IMEI Tool to repair or change your IMEI number. Donsson MTK IMEI Tool is a free and easy-to-use tool that works on Windows computers and supports all MediaTek devices. In this article, we will show you how to use Donsson MTK IMEI Tool to fix your IMEI problem.

Requirements

- A Windows PC with Donsson MTK IMEI Tool installed. You can download the latest version of Donsson MTK IMEI Tool from [here](#).
- A MediaTek device with USB debugging enabled. To enable USB debugging, go to Settings > About phone > Tap on Build number 7 times > Go back to Settings > Developer options > Enable USB debugging.
- A USB cable to connect your device to your PC.
- A valid IMEI number for your device. You can find your original IMEI number on the back of your device, on the box, or by dialing *#06# on your phone.

Steps to Use Donsson MTK IMEI Tool

1. Launch Donsson MTK IMEI Tool on your PC.
2. Connect your MediaTek device to your PC via USB cable. Make sure your device is detected by the tool.
3. Enter your IMEI number in the IMEI box. If you have a dual SIM device, enter both IMEI numbers in the respective boxes.
4. Click on the Write button to start writing or flashing your IMEI number on your device.
5. Wait for the process to complete. You will see a green PASS message when it is done.

6. Disconnect your device and reboot it.
7. Check your IMEI number by dialing *#06# on your phone. It should match the one you entered in the tool.

Conclusion

Donsson MTK IMEI Tool is a simple and effective tool that can help you repair or change your IMEI number on any MediaTek device. It is compatible with all Windows versions and supports all MediaTek devices. However, you should be careful while using this tool as changing or flashing an invalid or fake IMEI number may cause serious trouble for you. Always use your original or genuine IMEI number and do not share it with anyone else.

## Benefits of Repairing IMEI on MediaTek Devices

Repairing IMEI on MediaTek devices can have several benefits for your device performance and functionality. Some of the benefits are:

- It can fix network issues such as no service, invalid SIM, or emergency calls only.
- It can restore your device warranty and legal status.
- It can prevent your device from being blacklisted or blocked by network operators or authorities.
- It can improve your device security and privacy.
- It can enable you to use different SIM cards from different carriers on your device.

However, repairing IMEI on MediaTek devices should be done with caution and responsibility. You should always use your original or genuine IMEI number and not change it to a fake or invalid one. Changing or flashing an IMEI number that does not belong to your device may cause serious trouble for you and others. It may also violate the laws and regulations of your country or region. Therefore, you should only use Donsson MTK IMEI Tool for legitimate purposes and not for any illegal or unethical activities.

## Frequently Asked Questions

Here are some of the frequently asked questions about Donsson MTK IMEI Tool and IMEI repair on MediaTek devices:

Q: Is Donsson MTK IMEI Tool safe to use?

A: Yes, Donsson MTK IMEI Tool is safe to use as long as you download it from a trusted source and use it for legitimate purposes. However, you should always backup your data and device before using any tool or flashing any firmware on your device.

Q: Does Donsson MTK IMEI Tool support all MediaTek devices?

A: Yes, Donsson MTK IMEI Tool supports all MediaTek devices that have a single SIM slot or a dual SIM slot. However, some devices may require additional drivers or settings to work properly with the tool.

Q: What if I don't know my original IMEI number?

A: If you don't know your original IMEI number, you can try to find it on the back of your device, on the box, or by dialing \*#06# on your phone. If none of these methods work, you can try to contact your device manufacturer or seller for assistance.

Q: What if I get an error message while using Donsson MTK IMEI Tool?

A: If you get an error message while using Donsson MTK IMEI Tool, you can try to troubleshoot it by following these steps:

- Make sure you have installed the correct USB drivers for your device on your PC.
- Make sure you have enabled USB debugging on your device and granted permission to the tool.
- Make sure you have entered the correct IMEI number in the tool.
- Make sure you have a stable USB connection between your device and your PC.
- Make sure you have enough battery power on your device.
- Make sure you have closed any other programs or processes that may interfere with the tool.
- If none of these steps work, you can try to restart your device and your PC and try again.
